All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Maryland - Frederick County - YRBS, 2014 - QN40
The bar chart shows the percentage of high school students who currently used tobacco by sex, grade, and race/ethnicity for the year 2014. The chart indicates a higher percentage of male students compared to female students across all grades. The highest percentage among male students is recorded in the 12th grade, while the highest percentage among female students is in the 11th grade. Black students show the highest percentage across all grades, followed by Hispanic and White students. The chart also includes a note that all Hispanic students are included in the Hispanic category and all other races are non-Hispanic. The survey is based on weighted results.
